Ordering & Shipping

Ordering

Phone Orders - Phone orders and questions are always welcome. Please have the Part # ready to save time. **After Hours Order Line** - If you call after store hours (**Monday through Friday 9-5:30pm Sat. 9-Noon**) you can leave your order as a phone message. Leave your **Credit Card** information.

Mail Orders

Ordering from our catalog is simple. Just send the enclosed order form along with your payment to:

Classic Parts of America
1 Chevy Duty Drive,
Kansas City, MO 64150

Online Orders

You can use our online store to order your parts. Just go to www.ClassicParts.com, find the items you want, and place them in the shopping cart. The parts will be delivered to your shipping address.

Shipping

(OS) Oversized - Please call for approximate cost. These items require additional handling or may need to be shipped Truckline.
US Orders - \$9.95 minimum

Foreign Orders

We do ship foreign orders. Call for approximate shipping cost.

Prices

Prices listed are each unless otherwise specified. Also, prices are subject to change without notice.

Payment

Money Orders, Discover, American Express, MasterCard and Visa are accepted. Personal checks are welcome and require a drivers license number for processing, but please expect a delay for bank clearance.

Sales Tax

If your order is shipping to a location in the state of Missouri, you will be charged Missouri state sales tax at the current rate of 6.6. Due to the June 21st, 2018 Supreme Court ruling that allows states to require online retailers to collect internet sales taxes, we may be required to collect state sales tax for the following states, AL, CA, CT, CO, GA, IL, IN, IA, KY, LA, ME, MD, MI, MN, MS, NE, NV, NJ, NY, NC, ND, OH, OK, PA, RI, SC, SD, TN, TX, UT, VT, WA, WV, WI & WY.

Damages & Shortages

If parts are damaged in shipping, please notify Classic Parts as soon as possible so that we can take care of the claim. Shortages & damaged merchandise must be reported within **5 days**.

Returns

The returned item should be in the original condition and you must call us for an **RMA# (Return Authorization Number)**. Please include reason for return and a copy of the invoice with the returned item. Returns must be received within **30 days**. We will not accept returns without a Return Authorization Number.

Drop-Shipped (DS) products will be subject to a **20%** restocking fee. Some items in the catalog may be drop-shipped, but are not indicated as such. Classic Parts of America reserves the right to add this charge on any drop-shipped item that is returned.

NON-RETURNABLE ITEMS

The following items **may not** be returned for refund or credit: Carburetor kits, Books, Literature, Decals, Electrical items, and all **Special Order** items. Should you receive a defective item, we will be happy to replace it.

Warranty

The following is made in lieu of all warranties expressed or implied. Seller's & manufacturer's only obligation shall be to replace such quantity of the product proved to be defective. Neither seller nor manufacturer shall be liable for any loss, injury or damage, direct or consequential arising out of the use of or the inabilities of the product. After use, the user shall assume all risk and liability whatsoever in connection there within.

Drop-shipped Items

Please allow additional time on all drop-shipped items as the time differs depending on the supplier. There is a 20% restocking fee on drop-ship returns.

Shipping Rates

Within the USA, shipping costs are calculated based on the dollar value of your order and the shipping method you choose. There is an \$9.95 minimum shipping charge. We charge a flat rate of \$9.95, \$14.95, \$19.95, or \$24.95 based upon your merchandise total* (some restrictions apply). Orders must ship by "ground" service within the 48 contiguous US States. (This excludes Alaska, Hawaii, and Puerto Rico. Normal carrier rates apply.) Domestic Air and International service is not included... normal carrier rates apply. Some of our items are oversized and are subject to additional shipping fees. This fee varies based on the individual product and it's size. These additional shipping fees will be added to our Flat Rate Shipping.

Order Total From \$	Order Total To \$	Shipping Charge
\$0.00	\$24.99	\$9.95
\$25.00	\$74.99	\$12.95
\$75.00	\$149.99	\$14.95
\$150.00	\$249.99	\$19.95
\$250.00	\$349.99	\$24.95
\$350.00	\$449.99	\$27.95
\$450.00	\$549.99	\$29.95
\$550.00	\$749.99	\$39.95
\$750.00	\$999.99	\$49.95
\$1,000.00	\$1,999.99	\$79.95
\$2,000.00	and Up	\$99.95

* OS (Oversized), AH (Additional Handling), or Truckline items such as, but not limited to; Tailgates, Bumpers, Fenders, Grills, Bed wood, Bed strips, Hoods, etc...will incur an additional product specific shipping charge due to their size and/or weight. Orders that will be shipped outside of the 48 contiguous states, (Alaska, Hawaii, Puerto Rico and all other Countries including Canada) do not qualify for "Flat Rate Shipping". Shipping charges will be calculated based upon Ground or Truckline Freight actual rates and the ship to zip code for those items only. Please contact us regarding shipping for OS, AH, or Truckline items. (1-800-741-1678)

Please note: All orders are subject to shipping charges verification before processing.

Chevrolet Trucks 100 Years

220 pages of the 100 year history of the Chevrolet Trucks that recounts Chevrolet's epic trucking story. Created in partnership with Chevrolet, this officially licensed book includes hundreds of photos from the historic archives at Chevrolet. Automotive journalist Larry Edsall interviewed key truck personnel to weave together the story of the Chevrolet truck evolution from working vehicle to lifestyle companion.

Discover why millions of truck owners have made Chevrolet #1.

Bed Parts

Bed Side Panel

(**OS-oversize item-ask for approximate shipping cost) A complete bed side is made up of the bed side panel, the front and rear stake pockets and steel angle strip. These bed sides are manufactured from 16-gage electro-galvanized steel. Sides are ready to primer and bolt to the truck. We provide holes in the bed sides for fender and front bed panel installation, and angle strips are punched with square holes. Includes free teardrop piece for welding into the curl of your bed side and complete bed assembly instructions. Made in USA.

VHX Speedo & Gauge Kit

For GM Truck enthusiasts, the curvy lines of this model made it an instant classic just begging for modern upgrades like the VHX Series. Fully machined, show chromed bezels are included, making installation effortless.

Fully lit needles, backlit faces, and highly visible LCD message centers are a few of the things that you can see which set the VHX Series apart from yesterday's traditional approach to instrumentation. A few of the features which you don't normally see are the micro-controlled precision stepper motors, solid state sensors for unparalleled accuracy, and user-customizable display feedback, all supported by an unrivaled limited lifetime warranty.

54-013	(34-39).....6 Volt - Low & High Beam.....	\$14.95ea

Headlamp Relay Harness Kit - H4 & 6014

Sends higher amperage to headlamp, handles higher wattage bulbs, cures dim lights. Also cures headlamp switch failure by bypassing current through switch and drawing current directly from battery. Original switch activates relays to turn headlights on. Used on single headlamps only and used only when using high amperage aftermarket headlamps.

52-298	(41-46).....	\$39.95ea

Highway 15 Plus Wiring Harness

American Autowire just made some upgrades to the Highway 15 Universal Wiring System that you need to know about! The Highway 15 Plus will include all of the best features of the original version with these upgrades:

- A built-in LED flasher to support LED turn signals without the need to purchase an additional item.
- A back up light feed and power wires to make the harness easier to install in a more modern vehicle.
- Improvements to our instructions to cite a wider range of examples and real-world scenarios. The panel labeling has also been updated along with the above physical changes, including wording modifications for enhanced clarity. Our new high amp alternator and main power connection kit. This allows for the use of high amp alternators, and provides an even better level of fuse protection for the panel and charging system. This new connection kit utilizes 6ga wire and two 175amp Megafuses.
- Extra connectors and wiring to more easily support a 4-headlight system without an additional add-on purchase.
 - Longer neutral safety wires for cars with console shifters.
 - An additional ignition circuit to support aftermarket components.
- Improved ignition switch with mating connector and 4 additional accessory and ignition terminals. Uses a square GM-style key.

52-094\$509.95ea

Highway 22 Plus Wiring Harness

Our Highway 22 has long been the flagship universal system for wiring high-tech, high-end custom vehicles.

To this point, we've seen and heard evidence of customers installing the kit in just about every make or model vintage (and some modern) vehicle, off-road trucks and even industrial equipment.

We're exceptionally grateful to be part of so many builds, and have taken note of some suggestions from over the years to make a great product even better. With those thoughts in mind, American Autowire is pleased to introduce the Highway 22 Plus!

Our goal with the changes in the Highway 22 Plus is to preserve the same feel as the original, with some modernization and ease of use improvements for both backyard and professional builders.

The full list of new features is below:

- Each kit will now include a built-in LED flasher to support LED turn signals without the need to purchase an additional item.
- We've added back up light feed and power wires to make the harness easier to install in a more modern vehicle.
- The pre-installed 20 amp relay can now be easily changed to function as either a keyed 12 volt or ground triggered item.
- We've improved our instructions to cite a wider range of examples and real-world scenarios. The panel labeling has also been updated along with the above physical changes, including wording modifications for enhanced clarity.
- The wiper circuit has been upgraded to a 20 amp fuse to support all aftermarket wiper systems. This has been made an accessory circuit for more adaptability.
- The AC/Heat fuse has also been moved to an accessory circuit to eliminate draw from the blower motor while the vehicle is being started.
- All kits will feature our new high amp alternator and main power connection kit. This allows for the use of high amp alternators, and provides an even better level of fuse protection for the panel and charging system. This new connection kit utilizes 6 ga wire and two 175 amp Megafuses.
- Extra connectors and wiring have been added to more easily support a 4-headlight system without an additional add-on purchase.
- Longer neutral safety wires for cars with console shifters.

Battery Storage & Maintenance Charger

The Battery Butler Battery Storage/Maintenance Chargers are specifically designed for the maintenance of 6 or 12 Volt batteries that are stored or only used periodically. These chargers will prevent the normal self-discharge of your battery, while extending the life of rechargeable 12 volt batteries by providing a minimum current, regulated output. Other types of chargers provide a strong, rapid charge that tend to boil out liquids and decay electrodes. With the Battery Butler charger, once your battery has been fully charged, it will automatically shut-off; then resume charging as your battery level drops.

350 HO Base 330HP

Forget rebuilding! Our 350 HO is assembled with all-new parts and high-flow heads, giving you more power than just about any production-spec Small-Block ever installed at the factory: 333 hp and a satisfying 381 lb.-ft. of torque. It's affordable power with dependability you can count on.

A cast-iron block with four-bolt main caps is the foundation for the 350 HO, which is topped with iron Vortec heads fitted with 1.94/1.50-inch valves. Its durable rotating assembly has aluminum pistons delivering a 9.0:1 compression ratio, while a hydraulic flat-tappet camshaft requires no periodic lash adjustments.

Check our website for tech specs and installation notes.

EN-0100 \$5,011.91ea

350 HO Deluxe 330HP

Forget rebuilding! Our 350 HO is assembled with all-new parts and high-flow heads, giving you more power than just about any production-spec Small-Block ever installed at the factory: 333 hp and a satisfying 381 lb.-ft. of torque. It's affordable power with dependability you can count on.

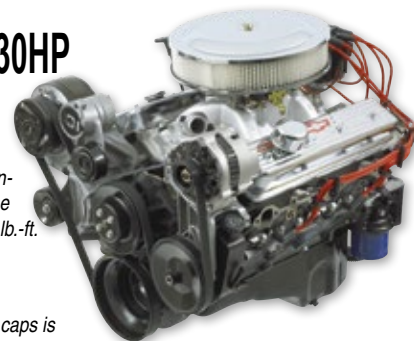

A cast-iron block with four-bolt main caps is the foundation for the 350 HO, which is topped with iron Vortec heads fitted with 1.94/1.50-inch valves. Its durable rotating assembly has aluminum pistons delivering a 9.0:1 compression ratio, while a hydraulic flat-tappet camshaft requires no periodic lash adjustments. The intake manifold, carburetor and distributor are included, but not installed.

Check our website for tech specs and installation notes.

EN-0101 \$6,610.42ea

350 HO Turn-Key 330HP

Forget rebuilding! Our 350 HO is assembled with all-new parts and high-flow heads, giving you more power than just about any production-spec Small-Block ever installed at the factory: 333 hp and a satisfying 381 lb.-ft. of torque. It's affordable power with dependability you can count on.

A cast-iron block with four-bolt main caps is the foundation for the 350 HO, which is topped with iron Vortec heads fitted with 1.94/1.50-inch valves. Its durable rotating assembly has aluminum pistons delivering a 9.0:1 compression ratio, while a hydraulic flat-tappet camshaft requires no periodic lash adjustments.

As one of our Turn-Key crate engines, the 350 HO Turn-Key comes with the intake manifold and distributor installed. It also includes the carburetor, front-accessory kit, starter, fuel pump and spark plug wires (not installed).

Check our website for tech specs and installation notes.

EN-0102 \$7,932.98ea

SP350CI - 357HP

If it's affordable performance you're looking for to power your project vehicle, Chevrolet Performance's SP350/357 delivers! With 357 horsepower and a deep reserve of low-rpm torque, it quickly reminds you why Chevrolet's original 350 Small-Block has been the industry benchmark for decades.

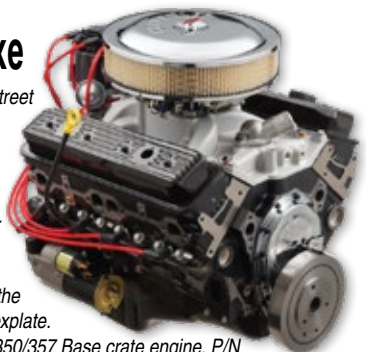

The SP350/357 leverages the strength of a strong rotating assembly secured in a brand-new block with four-bolt mains, along with economical Vortec iron cylinder heads. A roller camshaft optimizes drivability and airflow capability. It all adds up to a 24-horsepower gain over our 350 HO crate engine – and a great, affordable alternative to rebuilding.

Check our website for tech specs and installation notes.

EN-0110 \$5,342.66ea

SP350CI - 357HP Deluxe

As the latest in Chevrolet Performance's Street Performance crate engine lineup, the SP350/357 is designed as an affordable performer to match just about any budget. Better still, it uses stronger components and modern technology to make it a better alternative to rebuilding.

Our SP350/357 Deluxe package includes the intake manifold, distributor, damper and flexplate. Chevrolet Performance also offers the SP350/357 Base crate engine, P/N 12677167.

Check our website for tech specs and installation notes.

EN-0111 \$6,943.49ea

Crate Engines

SP350CI - 357HP Turn Key

Chevrolet Performance's line of Street Performance engines offers great power at a great value – and the latest is the SP350/357. It leverages the strength of a strong rotating assembly secured in a brand-new block with four-bolt mains, and matches it with modern valvetrain technology to support great high-rpm capability.

Economical iron cylinder heads deliver excellent airflow, while the latest intake manifold technology and a new hydraulic roller camshaft optimize airflow to push 357 horsepower and more than 400 lb.-ft. of torque! Better still, the engine is built with a durable rotating assembly set in a brand-new block with four-bolt mains. That's a feature you won't find on most rebuildable cores.

Our SP350/357 Turn-Key package comes complete with the distributor, carburetor and balancer installed. The starter, fuel pump air conditioning pump, alternator, front-end accessory drive kit and more are also included, ready to bolt on.

Chevrolet Performance also offers the SP350/357 Base crate engine, P/N 12677167 as well as the SP350/357

Deluxe P/N 12677170.

Check our website for tech specs and installation notes.

EN-0112\$8,158.45ea

ZZ6 EFI Deluxe 420HP

The ZZ6 EFI crate engine combines the drivability advantages of electronically controlled fuel injection with the versatility of the 350 Small-Block, pumping out 420 hp @ 5800 rpm and 408 lb-ft torque @ 4500 rpm. A traditional air filter option blends together horsepower and appearance without the need for third-party tuning, and its proven Fast Burn design and 2.00/1.55-inch valve springs support great performance and durability, resulting in a high rev while making the most out of every cubic inch. *Engine Does Not Include : Air Cleaner / Filter , Starter , Spark Plug Wires

EN-0120\$9,524.34ea

ZZ6 EFI Turn-Key - 420HP

The ZZ6 EFI Turn-Key crate engine offers modern performance balanced with traditional style that looks period perfect in your vintage Chevy!

Chevrolet Performance engineers adapted a unique, electronically controlled port fuel injection system to the ZZ6 350, using an aluminum intake manifold that has the appearance of a carbureted intake. A fuel injection throttle body mounted in place of the carburetor allows a traditional air cleaner to be installed on the engine.

A simple plug-and-play control system rounds out the package to get the engine running in your project without the need for third-party tuning.

Our Turn-Key crate engine kit includes the distributor and damper installed, with the throttle body, starter, air conditioning pump, alternator, single-belt Front-End Accessory Drive Kit and more also included. Chevrolet Performance also offers the ZZ6 EFI Deluxe kit, which includes the installed distributor and damper (P/N 19368149).

Check our website for tech specs and installation notes.

EN-0121\$11,387.67ea

LS3 - 430HP

As the standard engine in the fifth-generation Camaro SS and C6 Corvette, the high-revving, deep-breathing LS3 6.2L is poised to go down in history as one of Chevrolet's best and most versatile engines. It's no surprise that enthusiasts and builders have made it one of the most popular LS swap engines.

The LS3 is filled with components designed for high performance and longevity. The aluminum block is filled with a sturdy reciprocating assembly that combines with L92-type rectangular-port heads to deliver a 10.7:1 compression ratio. A high-lift, hydraulic roller camshaft complements the LS3's tremendous airflow capability and enhances its broad torque curve. Out-of-the-crate Horsepower is 430, with an impressive 425 lb.-ft. torque.

Our LS3 crate engine comes complete from the SS-specific oil pan to the ignition system. It also includes the intake manifold assembly with injectors and throttle body, exhaust manifolds, water pump, balancer, 58x reluctor wheel and 14-inch automatic-transmission flexplate. The SS oil pan doesn't suit all applications. Use the vehicles specific oil pan for original LS-powered vehicles or Chevrolet Performance's Muscle Car Oil Pan Kit P/N 19212593 for older vehicles.

Check our website for tech specs and installation notes.

EN-0165\$8,241.02ea

LS3 - 495HP

Our engineers took a production LS3 6.2L (376 cubic inches) and swapped the stock camshaft for the racing-inspired LS Hot Cam (P/N 88958753), which delivered a stunning 495 horsepower and 473 lb.-ft. of torque. That's nearly 14 percent more power and torque from a simple camshaft change!

We wasted no time in adding that terrific combination – dubbed LS376/480 – to our crate engine portfolio. The key to the power boost is the Hot Cam's 0.525-inch lift on both the intake and exhaust sides, along with 219-degree/228-degree duration specs. That's less lift on the intake side than the stock LS3 cam, but considerably more duration, allowing the valves to stay open longer to draw in more air from the rectangular-port L92-style heads.

The crate engine package includes the intake manifold, throttle body and fuel rail, along with the ignition system and exhaust manifolds. Use it with the LS376/480 controller kit P/N 19354330, which includes a special pedal for use with the engine's electronically controlled throttle.

Check our website for tech specs and installation notes.

EN-0167\$8,584.41ea

Crate Engines

LS3 - 525HP

With Chevrolet Performance's aggressive ASA camshaft – developed for the high-rpm world of circle-track racing – installed in the LS3 6.2L engine, it comes alive with 525 uncompromising horsepower. That makes it the most powerful naturally aspirated 6.2L street engine in our portfolio – and one that has an edge to it. You'll notice it in the idle quality and you'll feel it when the revs quickly climb.

The ASA camshaft is a hydraulic roller with .525-inch lift on both sides, along with 226 degrees duration on the intake side and 236 degrees on the exhaust side. Coupled with a tight, 110-degree lobe separation angle, it helps the engine deliver excellent throttle response and breathe exceptionally well at high rpm. And for durability, we complement the cam with higher-rate valve springs.

You'll need tuning to make the most of the engine in a late-model GM vehicle. If you plan to use the engine in a vintage car, you'll need controller kit P/N 19354332, which includes the throttle pedal to match its electronically controlled throttle body.

Check our website for tech specs and installation notes.

[EN-0169](#)\$10,010.24ea

Engine Controller Kit

The engine control module is the brain of your Gen III/IV LS- or Gen V LT-powered project vehicle and Chevrolet Performance is your source for controllers designed for easy, "plug-and-play" installation and, in most applications, no need for third-party tuning adjustments.

Unlike controllers from regular-production vehicles, which may or may not come with a used engine, Chevrolet Performance controllers are uniquely calibrated for installation in older vehicles. That means many features required for late-model production vehicles are "turned off," because they're not required in older cars and trucks. That prevents the unnecessary triggering of diagnostic trouble codes that could possibly affect performance or require additional calibration adjustments.

Our inclusive kits deliver all the components required to plug into the engine and get it running – from the controller itself and the accompanying wire harness to the mass airflow sensor, oxygen sensors and even a throttle pedal assembly for engines equipped with an electronic throttle body. The kits also include detailed instructions to help you do it right the first time, even if you have no experience.

Most kits include:

- Two oxygen sensors
- Two oxygen sensor mounting bosses (for installation in the exhaust system)
- A mass airflow meter
- A mass airflow meter mounting boss (for installation in the air intake system)
- A throttle pedal assembly (for use with the electronically operated throttle)
- A specific oil pressure sensor that is compatible with the harness (when needed)
- A complete wiring harness with fuse box and necessary cam sensor and MAP sensor jumpers
- Fuel pump power module for direct injected engines
- Fuel pressure sensor for direct injected engines
- The programmed controller
- An instruction sheet

Detail Chemicals

-Spray-On Car Wash: Provides a quick, safe wash without water. It whisks away dust, dirt, and road grime.

-Spray-On Car Wax: base wax enhancer that extends the life of your natural waxes and paint sealants.

-Speed Shine: maintains your car's lustrous finish between washings. Simply mist it on, gently wipe dry, and buff to a brilliant luster.

-Rinseless Wash & Wax: Short on Time? Short on Water? Here's a great way to get a fast-and-easy wash in your garage or driveway without rinsing.

-Liquid Wax: Removes minor imperfections, delivers deep, rich gloss, and safeguards your finish with carnauba-based protection.

-Interior Cleaner: Quickly and safely clean all interior surfaces and materials from headliner to carpet with minimal fuss.

-Best of Show Wash & Wax: Drop a quality wash on your ride and add stout carnauba wax protection to its finish in one easy step.

-Best of Show Spray Wax: Doesn't just add color, depth, and clarity, its rich carnauba/polymer formula also creates class-leading paint protection.

-Best of Show Wax: Generates incredible color, depth, and clarity. Three factors any concours judge looks for when he's scrutinizing paint.

-Best of Show Detailer: Doesn't just safely wipe away dust, fingerprints, and light dirt it also keeps your shine alive between washes.

-Metal Polish: Restores your metal's original brightness without scratching.

-Black Shine Trim Restorer: Trim looking dull and tired? Have good looking trim and want to keep it that way? Our Black Shine Trim Restorer does it all.

Truck Cover

Block-It Truck covers are made to last and can help protect your vehicles interior and finish from the sun, dew and pollutants. This unique nonwoven fabric construction is "breathable" to allow the passage of air for quick drying and to reduce heat build-up under the cover to keep your vehicle cooler in hot weather. Block-It Truck covers won't rot, mildew, shrink or stretch and has been treated for extra ultra-violet (UV) resistance. This fabric is not water proof - it is breathable to allow moisture, condensation and heat to escape from under the fabric. It features semi-custom fit, non-scratch grommets, neoprene elastic sewn into the front and rear hems for snug fit, overlapped seams that are double stitched. The cover only takes a few minutes to install and remove. Light duty fabric features 3 layers and heavy duty contains an added layer for a total of 4 layers

It seems as though, every day, I see more of these old Chevy & GMC trucks out there. They're really gaining popularity. I've enjoyed tinkering with them for years and hope you enjoy it as much as I do. It's not the trucks I like so much, it's the people who own them. We all share a common interest. In fact, I've met some of my best friends through this hobby. Yes, this business sells parts but it is based on service to you, our customer. So, if you have a question about your truck, please give us a call or drop us a line. We'd like to help.

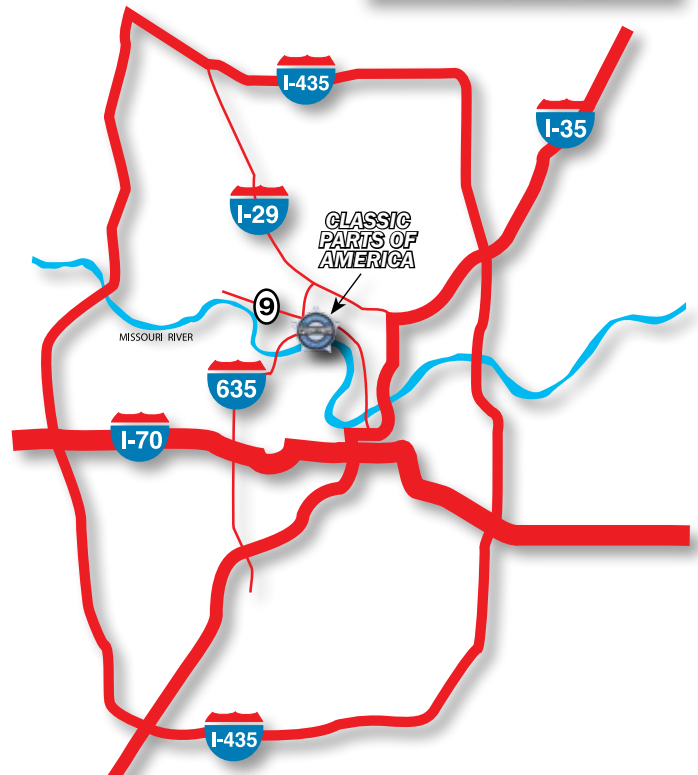

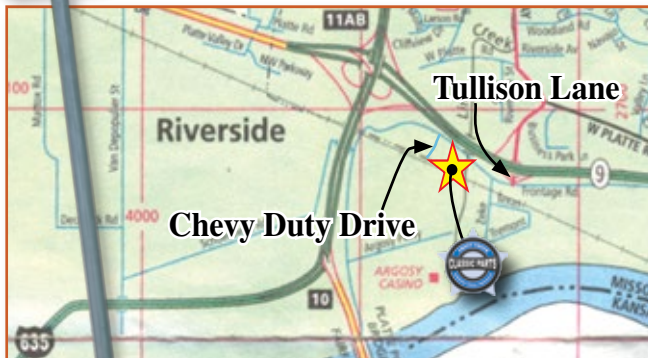

Mark Janom

If you are in the Kansas City area please stop by and visit our showroom. You'll find more than just parts! We offer friendly advice and great customer service too! We are conveniently located just off of Highway 9 in Kansas City, Missouri.
