12 Volt 30 Amp Generator Rebuild Service

A healthy generator can be the difference between being stuck on the side of the road, or getting home from an enjoyable ride. Unfortunately age and lack of use work together to make generators fail. Often owners of older vehicles are too ready to simply replace an original generator with an aftermarket unit or an alternator on an otherwise stock vehicle. In doing so they frequently find that new problems have been created, in addition to losing originality. The Ford Motor Company was very careful to install high-quality generators that were specifically matched with the other components as original equipment. This rebuild service is designed to bring your correct, rebuildable generator into the 21st century and give you years of faithful service. It includes a thorough cleaning, the wear-items are replaced, the internal settings are brought to factory specification, and it will be given a cosmetic restoration. It will be ready to bolt on with a minimum of work. Simply read the service form and follow the instructions. Our experts will take care of the rest and return your generator ready-to-go! You can count on MAC's for the parts and services you need!

Procar Seat Adapter Brackets

- Fits all Procar seats
- Mounts to original floor anchors
- Tested to ensure strength

Procar makes some great seats that provide comfort and support that was never possible with the originals. These brackets allow installation without fabricating adapters, or altering your floor. Not only will that make it easy to install your new seats, these brackets are designed to hold up to extreme forces. Nobody likes to think about having an accident in their pride and joy but we've all seen that it can happen. Order both sides if you are getting two seats and you will see this is simply the best option.

Seat Heater Kit

Now you can enjoy the comfort and warmth provided by seat heaters in your classic car. Perfect for that cool evening ride home from a cruise night. Each kit includes a two setting switch (high/low), a wiring harness and upper and lower carbon fiber element pads for one passenger seat. The switch can be placed wherever it is most convenient, on the dash or console, or for you stealth guys, hidden where no one can see it. Installation by a professional is recommended, as it requires partially removing the seat cover.

Crater Grain Headliner 1960-70

- Original grain vinyls cut to original dimensions
- Computer color matched colors
- Pre-stitched rod loops
- Exact replacement headliners for all models

MAC's has reproduced original "Starline" Grain material used Falcon and Ranchero. Our headliners feature the original grain materials as well as a selection of all the original factory COLORS. All headliners are cut exactly for each vehicle and feature pre-stitched rod loops. We offer the highest quality, best fitting headliners on the market!

Note: Crater Grain material is used on 1960-1963 to replace original cardboard and pin-point pattern vinyl.

Dash Cover

Here is a very low-cost alternative to a full dash pad replacement—our dash cover. All you do is clean your current dash pad, trim down the high spots, rough the surfaces to be glued and place it on top of your dash pad. Once the adhesive dries, you have the appearance of a brand-new dash with a much lower cost and a lot less work. Silicone adhesive and simple directions are included.

66 Black, can be painted, Falcon **41-39377^Δ** **126.99** ea.

Vinyl Protectant

Keep that dash pad looking brand new for years to come. Protect your new dash pad from harmful UV rays with our Raggtopp™ vinyl protectant. It's so easy to use; just spray it on, wipe it dry and you're done. It is specially formulated to repel dust, dirt and grease, plus it contains no silicones, so it's not slippery to the touch when it dries. Packaged in a convenient 16 oz. pump spray bottle.

Interior Paints

Choose from our vast selection of original color-matched interior paints. These paints match our interior vinyl colors. All paints are sold in 13oz. aerosol cans, and are color matched to original Ford samples for an EXACT match. We recommend the use of our vinyl preparation spray for the best adhesion and absorption of paint. We have listed the color and the years it was used in each sample.

Paints can be used on: plastic, vinyl, and metal interior trim.

Important note: Please verify your correct color before ordering, as not all paint colors are available. Paint is non-returnable.

Barrier Pad with Lead Septum

Multi-layered composite material which provides shock absorption, a noise penetration barrier and thermal insulation in a single product. The first (isolation) layer is constructed of closed cell neoprene foam which decouples the center layer from the source of vibration. Next, the thin lead center layer is a floating wall which, because of its high mass and relative thinness, is one of the most effective noise penetration barrier materials available. The third, or surface layer is also made of reinforced neoprene. This is to protect the lead center layer, and to maintain a sealed airspace for thermal insulation, for application over transmission tunnels and firewalls. It easily conforms to round, curved or irregular surfaces. Incredible insulation barrier as well as the ultimate for molded shaped panels and tough to reach surfaces that can not be accessed with a flat sheet. Measures 49" x 36" and yields 12 square feet of coverage.

Benefits:

- Suspended lead barrier reflects road noise entering from beneath the vehicle
- Molds easily to complex shapes for easy application
- Can be cut with scissors or utility knife
- Neoprene surface minimizes reflections within the vehicle or enclosure interior
- Closed cell construction provides R4 thermal insulation factor

ALL 41-74709^A 239.99 ea.

Moldable Sound Dampeners

A heat formable material for the door panels that will actually take the shape of your door shell when heat is applied. This will seal out vibration through your door and lost air when heating and cooling your car.

Note: 37" x 54" sheet of moldable sound dampening material—one sheet is usually enough to do two door panels.

Gasketing Foam

- Use between vehicle interior panels to cure annoying squeaks and buzzes
- Foam backing for custom upholstery
- Cut your own gaskets for any area of your restoration

One-eighth inch thick layer of neoprene, nitrile foam. Use between plastic interior and exterior panels, behind license plates and around third brake lights to prevent rattles from occurring. Perfect as a gasketing foam around speakers and as a foam backing for custom upholstery. Works great for headlight and taillight lenses too. Each unit yields 2.78 square feet of coverage.

Sound Deadening Package

This is the new standard in classic car sound deadening. As you know, factory insulation was minimal and allowed for a great deal of noise and air to transfer through your car. That is why you experience so much additional vibration and vehicle noise on older cars, as well as losing precious heat and air conditioning when running these systems. Since then, there have been many products developed for new cars to reduce road noise and provide better overall insulation creating a quieter ride, better heat and cooling retention in addition to a more comfortable interior environment. The dampening material in our package provides over 200% MORE dampening than stock asphalt materials.

Our main floor material is a composite with a solid vinyl barrier bonded to a foam layer which acts as a spring to reduce noise and absorb shock in the car when driving, creating a much quieter vehicle. This is the same-type of material being used in newer car factory designed systems. Then we use a heat formable material for the door panels that will actually take the shape of your door shell with a dryer. This will seal out vibration through your door and lost air when heating and cooling your car. Finally, we have a foam material with lead core that can be hand shaped to mold to the contour of your tunnel hump. Normally, you would use a flat sheet and try to wrap over a tunnel hump which cannot pick up the shape of the factory tunnel. Our premium sound deadening package will make your parts fit together and will give you a huge improvement in the reduction of noise and vibration. The kit includes enough material to do a complete two door car: floors, doors, rear quarter area and behind the seat. Additional material can be ordered separately for four door applications.

Kit Includes: One 37" x 57" dampening sheet, 10 each 13" x 30" aluminum dampening sheets, one barrier pad with lead core for forming to the tunnel hump, and four sheets of the loaded vinyl with foam padding.

Bulk Firewall Insulation

Another option used to lessen road noise and vibrations is the standby of all hot rodders nationwide. Our insulation sheets, with space-age reflective foil bonded on both sides, are rated R18.3 (700°F heat resistance). Can also be used behind kick panels, inside door panels, beneath the package tray and under carpeting.

BD Drinkster Consoles

One of the most practical products we've ever offered—the BC Seat Cruiser—is now available in a new, slightly smaller size. Compared to the original BC Cruiser, which is 11" wide at the front, the BD Drinkster is only 8-1/4". The storage compartment in the BC Cruiser is 8-1/2" wide, while the BD Drinkster is 7-3/4" at the front narrowing down to 7" at the rear, allowing you a bit more hip room. Slightly smaller but just as useful! Both have a softly padded hinged top that opens to reveal a spacious storage compartment, a sewn-in strap that allows you to secure the console to the seat, chrome accents on the cup holders and both are available in a dozen beautiful colors.

Low Rider Floor Consoles

If you don't want to share the front seat with a console, then we'd like to introduce our new Low-Rider Floor Console, specifically designed to sit on the transmission hump. It features two king-size drink holders and a spacious storage compartment with a hinged lid. On top of the console, just behind the hinged lid, is a pouch with an elastic mouth. This pouch holds sunglasses, cell phones, digital music players, maps, etc., securely in place while driving, yet allows for easy access when the car is not moving. This unit is upholstered in long-lasting automotive-grade vinyl with double-stitched French seams, just like its seat-mounted cousins.

Dash Tachometers

- Correct reproductions with upgraded LED lights

We now have an exact reproduction of the original Sprint dash mounted tachometers used on 1963/65 Falcons and Comets. These can be used on any model Ford as an add on accessory. Manufactured using original die-cast metal body and chromed steel front ring and back plate. Functions identical to the original with updated LED light and includes mounting hardware and a factory 2-year warranty. Very limited supply.

64-67	Cyclone.....	41-93160^Δ	399.99 ea.

Falcon/Sprint Tachometer Filter

- Must be used with HEI ignitions

Installed between the tachometer and the Ignition trigger Source (usually the coil) this filter traps, redirects, and dissipates the high voltage spikes and surges that are emitted by any late-model high-energy ignition system.

Also modifies the sharp up-and-down spikes into a semi-square wave signal for steady pointer readings and faster pointer response. Three color-coded wires allow fast and easy fool-proof connections for life-time protection and superior response on all classic tachometers.

- Colors of needle paint provide the proper reflectivity as the stock paints
- The 1 oz. Bottle of needle paint is more than enough to do 50 or more needle paintings

Needle paint is used to re-paint your old faded needles so they look as nice as your new white gauges. These needle paints come in 1 oz. bottles and unscrew to reveal a brush on the other end for easy application and painting of the needles. By using a brush there is no need to worry about overspray and taping off any parts of the instrument cluster.

Ram Air Hood

This hood is tough looking! It is made to match your Comet's original shape and dimensions. One nice feature is that while many want this type of

hood for looks, the Ram Air box can be opened up in many ways to become functional. If you choose to use this hood with hinges you will need to drill it for the bolts and tap the holes. Since it is lighter than the steel hood you will want to use springs with reduced tension. Those can be sourced, or the originals can be carefully heated until perfect. It can also be a lift-off hood with pins in each corner. As with all fiberglass body parts, best results are achieved by test-fitting and focusing on the details before painting. Install this hood and pay homage to those heady days of 1960s drag racing!

The windshield wiper system on any car works pretty hard during its lifetime unless you live in an arid climate. Even then, sunlight and heat take their toll on various components. Over many years, wiper motors drag the wipers and related transmission components back and forth across the big windshield in every kind of weather. Snow loads are especially hard on wiper motors. Wiper blades are subject to temperature extremes and excessive wear. Wiper arms lose their spring tension, which allows the blade to skip over the glass, even with fresh rubber refills. In addition, you have to worry about the washer system, with the washer pump, hoses, connectors, brackets, reservoir bag and other components. Keep your vehicle's windshield wiper system in top-working order with new parts from MAC's!

Windshield Wiper Motors

Got the vacuum motor blues? Has your electric motor seen better days? MAC's has the solution: Wiper motor kits! Included in every kit is a heavy-duty, two-speed, self-parking, 12-volt motor; a rotary control switch; a wiring harness and installation instructions. All components are made in the USA.

1-Piece Billet Aluminum Alternator Pulley with Fan

With a cast pulley, the aluminum is poured into a mold and then allowed to cool. This process can create variations in density throughout the pulley. Dense areas are heavier than the more porous areas causing the pulley to vibrate at high RPM. Our billet pulleys are equally dense throughout; equal weight translates to a true and balanced pulley drive system. Machined in the USA from 6061-T1 billet aluminum, this features a bolt on nose cone to hide the alternator nut and washer. We offer the industry's only one piece alternator pulley with fan!

Harmonic Balancers

Original equipment balancers use a nitrile rubber dampening medium between the inertia ring and the outer ring. This rubber breaks down over time, and in doing so reduces the effectiveness of the damper to cancel out damaging engine harmonics. Replace yours today and give yourself peace of mind.

BluePrint® Crate Engines

BluePrint means fun reliable horsepower that you can drive every day. Their experience means that BluePrint is the best choice for your crate engine. But more importantly—you want to get that horsepower from a solid, reputable company that does the job right and stands behind it. During their history, BluePrint has continued to build high-performance crate engines, and has always tried to give the buyer exactly what they wanted. That's another hallmark of BluePrint Engines - they build engines for all needs and budgets.

If you've been shopping, keep in mind that most crate engines DON'T come as complete as the premium engines on our site. Only these premium crate engines come complete with fuel system, ignition system, plugs, wires, and the water and fuel pumps. Also, know that you can opt for either forged or cast components on most models. Most of our buyers are spending a lot of time on their car. Spend a little more time looking for an engine, and you'll see the BluePrint difference!

PerTronix Billet Distributors

- Provides maximum ignition performance and easy installation
- Legal in all 50 states and Canada
- Black cap

This Plug-N-Play Billet vacuum advance and non-vacuum advance distributor is for Ford applications. Provides maximum ignition performance and easy installation. Features the patented Ignitor II electronic ignition module and a CNC machined 6061 T-6 polished billet housing and deck. PerTronix electronics is also compatible with any inductive ignition system coil, but high RPM performance can be improved when used with a low resistant (0.6 ohm) Flame-Thrower II coil. If you are using a multi-spark CD ignition box, no problem, the Flame-Thrower Billet distributor is compatible. Legal in all 50 states and Canada.

PerTronix Billet Vacuum Advance Distributor for 351W

- Allows you to upgrade your outdated points or stock electronic distributor with a performance proven distributor
- Features the patented Ignitor II electronic ignition module and a CNC machined 6061 T-6 polished billet housing and deck

The new Plug-N-Play Billet vacuum advance (and non vacuum advance models) distributor for small block Ford applications is designed to provide maximum ignition performance and easy installation all at a price you can afford. This distributor allows you to upgrade your outdated points or stock electronic distributor with a performance proven distributor that features the patented Ignitor II electronic ignition module and a CNC machined 6061 T-6 polished billet housing and deck. PerTronix electronics are also compatible with any inductive ignition system coil, but high RPM performance can be improved when used with a low resistance (0.6 ohm) Flame-Thrower II Coil. If you're using a multi-spark CD ignition box, no problem, the Flame-Thrower billet distributor is compatible. Additional features include a tempered .500" diameter shaft with low torsion displacement, an upper roller bearing and lower self-lubricating oil impregnated copper powder metal bushing and a durable machined heat-treated gear. Distributors come with a factory set performance curve, a mechanical advance limiting adjustment and small high dielectric strength cap and rotor for installations with tight clearance. This distributor is legal in all 50 states and Canada. (C.A.R.B. E.O. #D-57-23)

PerTronix Ignitor Hi-Performance Coils

More spark energy, with voltage to burn! This new 40,000 volt Flame-Thrower coil allows higher voltage which allows larger spark plug gaps for added power, smoother response and better fuel economy. A great companion to the Ignitor ignition system and high performance spark plug wires.

Flame-Thrower II Coil Systems

Improved high performance Flame-Thrower II coil increases to 45,000 volts and features low 0.6 ohm resistance. This coil is compatible with capacitive discharge systems (CD box). When used with the Ignitor II ignition, creates a 479% improvement at 3000 RPM over stock coil. More spark energy, with voltage to burn! This new Flame-Thrower coil allows higher voltage which allows larger spark plug gaps for added power, smoother response and better fuel economy.

This coil is intended to be used with Ignitor II ignition systems and cannot be used with standard Ignitor.

PerTronix Ignitor-II Ignition Systems

Millions have upgraded their point style ignitions with the Ignitor electronic module, gaining horsepower, quicker starting and longer plug life. Ignitor II takes it a step further by adding a powerful new microcontroller, that controls the dwell period, for the best possible spark over the entire RPM range. Ignitor II offers enhanced performance levels only found in more expensive "box-type" ignition systems. It fits entirely inside the distributor for the stock look, installs easily, and you'll never change or adjust your points again!

Accumate Power Charger

Nothing is worse than pulling your car out of storage and finding out your battery is dead. MAC's has a way to keep that from ever happening again: Our Accumate Power Charger. Accumate is an advanced, fully automatic battery charger and maintainer for all 6 and 12-volt lead-acid batteries. It will bring your battery up to a full charge and then go into standby mode. If your battery goes below a pre-determined level, the charging process is immediately restarted. Since it operates on normal 110 volt household current and only costs pennies to operate, plug it in and forget about it. From now on, your battery will always be ready.

Prop 65 warning for California residents, see inside front cover for details

A common fan belt problem occurs when belts jump off pulleys, especially under hard acceleration. Belts are often ruined this way, being torn or stretched out of shape. Remember that all pulleys must be exactly aligned with each other. Your belt should look like a perfectly straight line when you stand back and sight down the front edge of the belt from one pulley to another. If you notice a slight bend or change of direction in the belt

where it passes into the groove of a pulley, it will probably jump off under high RPMs. Align those pulleys as perfectly as possible. You might need to replace a bracket, or use shims on mounting bolts. Whatever it takes, get those pulleys lined up correctly and your fan belts will live longer. Your classic Ford will thank you!

Oil Filters

Everyone knows the importance of changing the oil regularly in your daily driver. It's important to do the same with your classic car. Nothing benefits an engine more than fresh oil and a new filter that's free from dirt and sludge. So give us a call, we'll be happy to send you a premium quality filter right away!

PowerGen Alternators

Get the reliability of an alternator with the classic look of a stock generator with PowerGen. Featuring 90 amps at highway speeds, but most importantly 60 big amps at idle; this is the new way to go. Your friends will think you stuffed an alternator into your generator housing when your headlights don't dim at idle! The PowerGen features an offset left hinge mount for V8 and comes in 3 distinct finishes. We also carry the new 2 wire type that allows you to enable the dash warning light (idiot light).

S-Drive Serpentine Pulley Kits for Small Block

- Complete system with A/C and power steering
- Manufactured using 6061-T6 aluminum
- All necessary brackets and hardware included
- Fits 289, 302, and 351W
- Made in the USA

Complete kit from Eddie Motorsports for Small Block Ford 289-351 including all new components; Ford Racing water pump, Sanden A/C compressor, Maval power steering pump, and Powermaster 140-amp alternator. The kit also comes with a billet aluminum timing cover with built in mount points for all of the accessories. When running this kit, an electric fuel pump must be used as there is no provision for a mechanical fuel pump in the front cover. The kit works with all small block Ford engines to guarantee an easy installation and exact fit. Polished kits come with polished A/C compressor, alternator, and water pump. Colored kits come with natural cast finished components. Specify type of steering (Gear Box or Rack and Pinion) and reservoir type (attached or remote) in the notes when placing the order.

ALL	Machined finish	41-91686^A	2250.99 kit
ALL	Polished finish	41-91687^A	2350.99 kit

NOTE: This is a custom ordered item, please see website for more options. Item has additional shipping charges due to heavy weight or oversize dimensions.

C4 and C6 Transmission Dipsticks and Tubes

Designed for accurate fluid reading and easy access, these filler tubes have the "no leak" hat seal and lock top stick. Since many transmissions build up pressure, the lock top stick helps prevent fluid from blowing out of the dipstick and going everywhere. These dipsticks and filler tubes are available in a variety of transmission-types.

Centerforce Clutch Systems

New Centerforce brand clutch systems are the best performing clutches you can buy for your classic Ford. Allows for stock installation with unparalleled frictional performance without heavy pedal feel. Performs better than stock clutches due to the use of centrifugal force which actually increases holding power as RPM increases, and offers 30% more holding capacity than a stock original equipment clutch. Note: Use 41-75463-1 or 41-75464-1 for correct throw-out bearing.

60-70	Falcon w/small-block V8 and 6-cylinder engine, 11" diameter, 10 spline organic disc, pressure plate clutch bolt—5	41-75461^Δ	345.99 kit

***NOTE:** This kit is the dual friction pressure plate and disc which offers 90% more holding power than a stock system. This clutch/disc set is designed for use with engines producing high horsepower and torque and is suitable for heavy cars and four wheel drives. All Centerforce clutches are designed for smooth engagement and light pedal feel without compromising high performance.

Ford Third Member Assemblies

Units will include new gears, new bearings, new seals and new housing. Third members are now built with stock cases, brand new Yukon brand nodular iron cases and pinion supports available, call for pricing. Units are sold less the pinion yoke. These units are warranted against defects for 12 months and unlimited miles. Unlike other suppliers our units are sold without a core charge, a real convenience. Your choice of ratios and differentials.

Grizzly Lockers

Yukon Grizzly Locker for Ford 9" differential 28-, 31- or 35-spline axles. Mechanical positive-locking differentials have been the staple for drag racing, circle track racing, off road use and a variety of other performance applications for decades. The latest in locking differentials, the Grizzly Locker features a forged case, 8620 internals and a patent pending design which reduces common locker failures. These units provide maximum traction and strength for many performance applications.

Differential Overhaul Kits

Our overhaul kits are the most complete kits available. Each kit only uses Timken Bearings and high quality seals. Each kit contains two pinion bearings, two carrier bearings, pinion depth shims, pinion nut, crush sleeve, pinion support bearing, ten ring gear bolts, gasket, marking compound and Loctite. The Ford 9" differential used different carrier bearings. Check the bearings on your existing differential for a number starting with LM, have this number ready when you order.

C4 Automatic Transmission Bellhousings

- Cast from high strength aluminum alloy
- SFI 30.1 certified
- Add on for C4 single transmission assemblies

For almost a decade, Performance Automatic has produced an incredibly versatile line of Pro Fit bellhousings. What makes this bellhousing so unique is that it is part of the Performance Automatic Pro Fit System. This bellhousing is CNC machined to accept the 157- or 164-tooth flexplates and starters thus eliminating any guesswork.

Remanufactured Power Steering Pumps

Due to lack of rebuildable cores for most of these we must rebuild your original power steering pump. When sending in your Eaton pump, DO NOT SEND THE RESERVOIR. Your rebuilt pump will not include a reservoir. Only the pump is being rebuilt. Eaton pumps were made in 2-styles; front mount and rear mount. These are not interchangeable. On our website, put this item in your cart, check out, and instructions on where to send your pump will be emailed to you.

Triangulated 4-Link Rear Suspension Kit with Coil-Overs

- 1" Upper and lower link bars
- Stainless steel adjusters
- Triangulated bolt-in cradle bracket
- Ridetech adjustable coil-over shocks
- Powder coated springs
- Upper coil-over crossmember
- Floor reinforcement plates
- Made for 8" or 9" rear ends
- Rear sway bar kit
- Polyurethane bushings
- Limited lifetime manufacturer warranty
- Proudly made in the USA.

TCI's triangulated 4-link rear suspension allows a lower stance for better handling and greater axle control, and is specifically engineered with strength and rigidity to handle today's higher horsepower engines. Installation mostly requires drilling and bolting in components except for welding the 4 tabs on top of your axle housing for the upper link bars. The included anti-sway bar will require brackets to be welded onto the axle housing as well. The kit is available for 8" and 9" axle housings (9" housings require weld on axle brackets). Please specify at the time of ordering.

Lowered Coil Springs

- These are made the right way!
- Lower your classic from 1-3 inches

New lowered coil springs are custom built to allow lowering your classic Ford from one to three inches. We have our coils built using the original Ford print specifications for load and height and have engineered the springs with the lowered height without compressing or cutting a coil. These are made the right way. Get your lowered leaf springs to go with them for the ultimate lowering package. Specify 1, 2, or 3 inch drop when ordering. Custom made, please allow 2-3 weeks for delivery. Made in the USA!

Coil-Over Rear Suspension Kit

This quality kit is the perfect companion to our Mustang II conversion or can be used by itself. The complete kit allows you to replace your "tired" leaf springs with a 100% bolt in adjustable ride height coil-over suspension. The coil is fully adjustable for ride height that you require. **NO WELDING REQUIRED!** Use our "slide adjust" mounting bracket system to bolt the threaded aluminum Aldan Eagle coil over shocks-springs and lower two links to your 8" or 9" housing. Body roll and front to rear roll couple is controlled by our bolt-in 3/4" black powder coated sway bar and end link package. Minimum installation hassle with maximum results!! Creates a more stable performance ride for better handling and road feel. One inch outside diameter x .120 wall round steel tubing with 5/8" rod ends make up the upper two triangulated links that bolt to your housing using our center section bracket. Upper link bar bolts between the frame rails for a 100% no weld anywhere installation. The upper two links are adjustable for fine tuning on pinion angle if necessary. Comes with all grade 8 hardware and thorough installation instructions. Optional chrome springs are available for an additional charge. Coil over spanner wrench included.

TCI Complete Mustang II Front Suspension and Brake Systems with Manual Steering

- (1) V8 crossmember and motor mount kit
- (1) Pair of coil springs
- (1) Set of upper and lower tubular control arms with hardware
- (1) Rebuilt manual steering rack with tie rod ends
- (1) Pair of gas shocks and upper spring cushion pads
- (1) U-joint kit for steering shaft with bearings and adapter for column
- (1) Pair of inner fender repair panels and frame bracket kit
- (1) Anti-sway bar with all hardware
- 11" Disc brake kit and brake hoses

You can now have the feel of late model vehicles while improving safety at the same time! You will experience handling never before possible on your classic with this rack and pinion system. The MII redesign tubular front, along with the brake package combine to make this a great choice for a better handling and ride comfort. This design opens the engine bay by deleting the shock towers, thus creating ample room for the larger V8 engines that were previously "off-limits" for these shock tower cars: 351W, 351C, 429/460, and FE 390/427/428. All parts are jig assembled and fully TIG welded using quality components and craftsmanship from right here in the U.S.A. You can use the type of disc brake master cylinder you want, and you will need a rear sump oil pan. Everything else needed to complete this conversion is included in this incredible package.

TCI Complete Front End Suspension Assembly

- 2" Drop spindles or stock height
- New manual rack and pinion steering gear
- Synthetic greasable urethane bushings
- 1" Upper and 1-1/8" lower tubular a-arms
- 1" Performance anti-sway bar
- Small block motor mounts
- Frame reinforcing plates
- Inner fender panels
- Big bore calipers
- 11" Drilled and slotted Zinc plated rotors

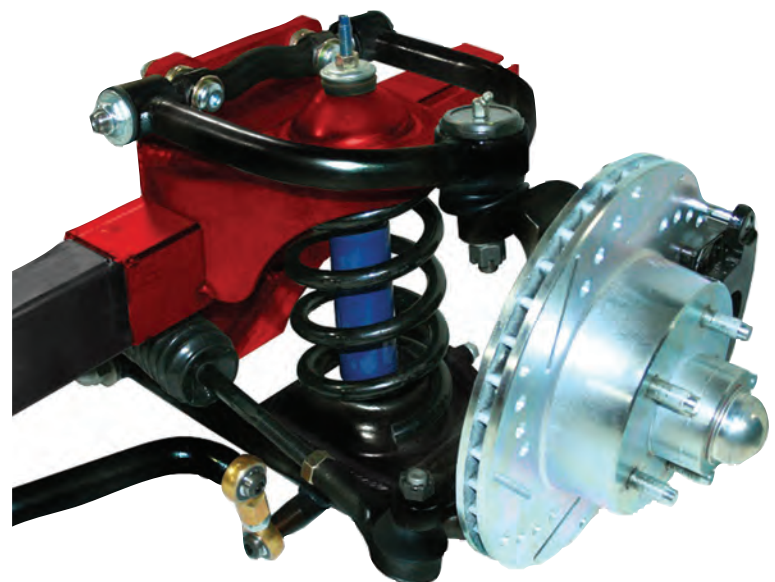

This TCI front end assembly opens up the engine compartment area for header clearance and big block engine installs. The TCI custom front end upgrades your steering, brakes and front suspension all in one and is a weld-in product. All products are engineered with US domestic steel. Rotor, spindles, and brake units come assembled with bearings packed with hi-temp grease. This independent front suspension kit will require a rear sump oil pan to clear the rack and will not work with 351 Cleveland motors. Fits Falcon, Ranchero and Comet.

Drum Brake Hardware Kit

The drum brake hardware kit listed below includes hold-down springs, washers, nails (pins), horseshoe locks, rubber plugs, adjusting springs and return springs for 2 wheels (one axle). You might be able to use this kit on earlier model

vehicles, but be aware that the hole in the backing plate for the hold down pin might be too large and could require the use of a washer.

Brake Shoe Hold-Down Kits

The springs, clips and other parts that operate your brake shoes are subject to tremendous heat, corrosion and other elements, which tend to severely weaken them. Replace all springs, adjusters and other hardware while you're doing your brake job to ensure proper performance. Each kit contains hold-down springs, washers, horseshoe locks, nails and rubber hole plugs. Kit contents are not available separately at this time, except horseshoe locks and rubber hole plugs. One kit does two wheels.

Relined Brake Shoes

Always measure your drum diameter and brake shoe width to make sure you get the correct set of shoes. We use an experienced and trusted brake shoe rebuilder to be able to provide our customers with high-quality relined brake shoes for reliable braking performance. Replace all the brakes on your car at once for consistent results at every wheel. The brake shoes listed below are sold on an exchange basis. Your rebuildable core must be returned in the same box that the relined shoes arrived in. The 40.00 core charge will be refunded if an acceptable core is received within 90 days of purchase date.

Remember that metal brake shoes are usually faced with brake linings of different length. The shoe with the longer lining goes on the rear side of your brakes toward your tail lights and is called the "secondary" shoe. Before you install new brake shoes, be sure to check the condition of the grease seals. It's good insurance to replace them now and save yourself the trouble later.

If your master cylinder is the heart of the brake system, then the wheel cylinders are surely the muscles. They directly convert hydraulic pressure into the mechanical motion that presses the brake shoes against the rotating brake drum surface, stopping the vehicle using a huge amount of friction. If a wheel cylinder freezes up or begins to leak, the entire system ceases to function properly. We have all experienced the frustration of bleeder valves that are stuck or, worse, that break. Be sure your brake system is in tip-top shape with brand new wheel cylinders!

Power Disc Brake Kits

- Convert your original manual drum brake system to power

**BUY THE KIT
AND SAVE \$\$\$!**

Kit includes a new power booster, dual bowl master cylinder, large high quality rotors, loaded calipers, brake hoses, bearings, seals and dust caps. Front or rear available: 15" wheel minimum required. Brake proportioning valve sold separately. Photo may look different from actual part.

60-65	5-lug.....	41-83979^Δ	1229.99 kit

Bolt-On Disc Brake Conversion Kits

This kit features special adapter plates that allows you to use your stock spindles. The advantage to this is the customer does not have to remove the spindle (no spindle tools for ball joint separation or re-installation needed) and does not have to have the front end re-aligned, saving time and expense. Additionally, this kit uses a smaller, lower profile caliper that allows the use of most factory 14" wheels. All disc brake kits come with detailed instructions and will require custom lines to be run from the master cylinder to the calipers.

Ford emergency brake systems are relatively simple and generally reliable. But when corrosion, wear, non-usage and time take their toll, the emergency (or parking) brake system can let you down. Carefully examine the components on your classic Ford. If they seem corroded, worn, or just plain reluctant to move freely, replace them immediately. MAC's has the parts you need.

Gas Tank Refurbishing Kit

If you can't find a gas tank for your car or don't want to spend the money on a new one, we offer a gas tank refurbishing kit that is right up your alley.

The kit includes:

- POR-701, POR-Patch, which is impervious to fuels and solvents once it is dry, making it perfect for repairing the outside of your gas tank. Use it to seal any cracks or pinholes and retard further rusting from the outside in.
- RSP106, gas tank etch, will remove the light buildup of rust from inside your tank and leave a gray phosphate coating.
- RSP22A, gas tank sealer, is used after you have etched your tank. It will seal the inside of your tank, permanently preventing future rust, leaks or corrosion from happening inside out with your tank.
- RSP87, Alumi-Blast paint, acts as the final step in tank refurbishment. It will restore the fresh aluminum look to the outside of your tank.
- Cannot be shipped by air

- ALL 4 pieces * **41-19946^A** **78.99** kit

Choke Thermostats

Want to have a choke that will help your car start easier, make it run better and maybe even give you better gas mileage? Then check out our choke thermostats. These are not run-of-the-mill generic chokes; they are calibrated to specific carburetor tag numbers. If you are lucky enough to still have the original tag, you can match the numbers and get the correct choke for your car. If no tag is present, match up the years, engine size and style of carburetor to get the correct choke.

Carburetor Needles and Seats

This new design needle and seat will cure the many ills of a conventional needle and seat. It helps eliminate "flood over" dirt and rust sticking to the needle and gives a more consistent fuel level. All this adds up to better fuel economy and as an added bonus, it will outlast any currently available needle and seat. It is precision made and the inverted flare seat provides positive sealing and improved fuel control. The needle contains a high quality "fluorocarbon" alcohol resistant rubber disc that rotates in the end of the needle, thus insuring a positive seal every time. Install one in your carb and you'll reap the benefits from day one.

Carburetor Secondary Diaphragm and Actuator Arm

Because the 4100 series 4-barrel carburetors are now more than 50 years old, it stands to reason that most have been rebuilt. Sometimes the rebuilders might have used what they had available, correct or not. The "early"-style has a steel secondary diaphragm actuator arm and the "late"-style has a plastic arm. The "early"-style secondary diaphragm is no longer available, but you can use the "late"-style if you replace the steel actuator arm with the "late"-style plastic arm. Please take a look at the actuator arm so you know exactly what you need before placing your order.

Holley Street Warrior 600CFM Universal Carburetor

- Performance upgrade for stock to mildly modified V-8 engines
- Calibrated for excellent street performance right out of the box
- Vibratory polished aluminum for good looks and long lasting shine

Holley has been the world leader in carburetors for over 100 years. We are proud to announce the newest member of our carburetor family- the Street Warrior. The goal in designing the Street Warrior was to take all of those years of experience and build the ultimate performance street carburetor for your daily driver that would not break the bank. Don't let the low price fool you. The Street Warrior uses the latest technology and quality products that Holley is known for. Constructed from aluminum and calibrated to run great right out of the box. The Street Warrior is a great replacement carburetor for your daily driver or your weekend cruiser. Perfect replacement carburetor when your original style is no longer available. Replaces Holley, Edelbrock, Carter AFB, and Autolite style carburetors with 5-3/16" x 5-5/8" bolt pattern.

Classic Holley 750 CFM Carburetor with Electric Choke

One of the most widely used Holley carbs of all time - the 0-80508S! Its dual-feed fuel inlets assure you get all the fuel you need and its 750 CFM of airflow makes it the perfect performance upgrade carb. Its vacuum secondaries and electric choke make it super easy to use on a wide range of vehicles. Don't trust your performance to just anyone, Holley is the only modular carburetor company that has been in business for over 100 years and has powered every NASCAR champion since the '60s

Mr. Gasket Fuel Line for Holley 4160 Series Carburetors

- Chrome plated 3/8 in copper
- Hex design fittings
- Fits most holley 4160 style carburetors w/primary metering block and secondary metering plate

This is the perfect fuel supply line for dual-inlet Holley 4bbl 4160 series carburetors. It has generous 3/8" tubes to supply plenty of fuel, and the threaded fittings have the necessary 8-21/32" centers for the 4160. The bright chrome plating of the gas line kit adds the special "touch of class" to your engine compartment. It's constructed with copper tubing, brass fittings and silver brazed connections. The "hex" design provides wrenching area for easier installation of fittings. It does not include inverted flare fittings. If your carburetor requires 7/8-20 threaded inlet, please use Holley part# 26-26 fittings

FiTech Fuel Injection Kits

- Replaces your single 4-barrel carburetor with precise fuel injection technology
- Works with factory or aftermarket single 4-barrel intake manifolds and air cleaner assemblies
- Uses same throttle and transmission linkage as 4150 Holley carburetors
- Supports normally aspirated, supercharger/turbocharger and nitrous
- Instant starting and throttle response (even after long term storage)
- Improves mileage, offers superior all-weather drivability

Never buy a carburetor again! FiTech Fuel Injection is dedicated to engineering, developing, and producing the most advanced and affordable electronic fuel injection systems on the planet. This system replaces your single 4-barrel carburetor with precise fuel injection technology. It works with factory or aftermarket single 4-barrel square bore intake manifolds and air cleaner assemblies. You will enjoy the way it eliminates hard starting, sputtering, cold start difficulty, and interior fuel smell. Also unlike a carburetor you will see instant starting and throttle response, even after long term storage along with improved mileage and superior all-weather drivability. This system is so advanced that it self-tunes in minutes with no laptop required. It is truly an investment in the future enjoyment and reliability of your vehicle

- Uses same throttle and transmission linkage as 4150 Holley carburetors
- Instant starting and throttle response (even after long term storage)

Dual Quad! EFI! Nothing says muscle like 2 big 4-barrels on a V8. FiTech EFI has made it simple with their Go EFI 2x4 625 HP self-tuning system. This kit is a bolt on for the most popular manifolds including the Edelbrock line of dual quad manifolds WITHOUT any adapters! They fit and look like they belong there because they were designed to fit from the start. The normally aspirated kits are good thru 625 hp but our Go EFI 2x4 POWER ADDER kit can handle you guys with the bigger cubes and roots superchargers. One throttle body handles all of the brains while the second holds 4 additional injectors, and the IAC motor for idle stability. These can also be used in cross ram and tunnel ram configurations. High Performance Aluminum Radiator

Radiator features extra large 1" tubes for 4-row efficiency but with 5-7 lbs. less weight, with a baffle at the top to help evenly distribute the flow of hot water across the upper part of the radiator. The original radiators had a real problem distributing the hot water to the far right side of the radiator. This design provides significant changes in the temperatures across the radiator's cooling tubes. Integrated transmission cooler is built inside the unit. Requires some minor modification to the original core support for fitment of edges of tanks.

Griffin Aluminum Radiators

Aluminum radiators manufactured to the strictest tolerances. Not only are they heli-arc welded and vacuum brazed, but the core is reinforced with a special high temperature epoxy that provides tube to header strength and helps prevent vibration failure. This process is Q-1 approved by the Ford Motor Company, one of the toughest standards in the industry. All radiators are 2 row, and feature either 1" or 1-1/4" tube cores.

C&R Racing OE-fit radiator modules offer the latest in aluminum core designs for optimum cooling performance. C&R Racing OE-fit radiator modules cannot be beat for performance and simplicity, with features like SPAL fans, fluid coolers, unique fan mounting and an exclusive upper soft mounting system. These modules will lower oil temperatures better than any air to oil cooler.

Gano In-Line Coolant Filter

The Gano Filter is a full flow filter that is designed to be installed in the upper radiator hose. Once installed it will prevent rust scale and other foreign particles from clogging your radiator. This product will allow your radiator to enjoy a long life and prevent repair and replacement. The filter installs easily inside your hose. Each kit includes one filter, two worm drive hose clamps, one safety wire, and installation instructions.

Tower-Type Hose Clamps

Research has indicated that this type of tower hose clamp was in factory use throughout the Ford line beginning in 1961 and was phased out during the 1968 model year. Instances of use prior to 1961 have been discovered, however, definite knowledge as to the extent of this pre-1961 use is not presently available.

Perfect Fit Air Conditioning System **Buy The Kit and SAVE!**

A robust, in-dash, heat/cool and defrost total climate control system that replaces the old heater/defrost box. The factory heater panel controls the system. Designed specifically for each year, make and model. Stock dash vent locations on most applications for that sought after—but until now, rarely achieved—factory air appearance! Floor and dash (bi-level) A/C and heat with dehumidified defrost provide the driver with total airflow control and superior passenger comfort in all climates. Large separate heat and A/C coils are very important features exclusive to the Perfect Fit Series. Each system is supplied with very detailed, photo illustrated instructions.

Gano Heater Core Filter

- Installs in the hose that connects between the engine and the heater input

Rust scale and gasket material can collect in the heater core forcing one to replace the heater core at great expense. This Gano filter installs in the hose that connects between the engine and the heater input. It catches rust scale and gasket parts before they can clog the heater core. This is a permanent accessory that can be disassembled, cleaned and replaced.

Constant Voltage Regulators

The constant what? Very few people are even aware that their car has one of these until it goes bad. If all the dash gauges read the maximum, then this is the culprit. Its job is to feed a constant stream of lowered voltage to your gauges. When it fails, the voltage is allowed to increase and all your needles are pegged to the right. It's located on the back of the instrument cluster. If you have a problem with just one gauge, then it's likely the sending unit or the dash gauge.

Battery Cables and Ground Straps

Our reproduction cables could be the trophy-winning touch for your classic! The wire insulation is original Neoprene rubber and all terminals, boots, heads and mouldings have been duplicated to precise detail. Each set includes the positive, negative and starter cables. From 1960 through 1969, a ground strap was also used at the back of the cylinder head. Reproductions of these ground straps are also available (see the last two items listed). By 1970, the separate ground strap was eliminated by incorporating a ground lug into the negative battery cable.

Accumate Power Charger

Nothing is worse than pulling your car out of storage and finding out your battery is dead. MAC's has a way to keep that from ever happening again: Our Accumate Power Charger. Accumate is an advanced, fully automatic battery charger and maintainer for all 6 and 12-volt lead-acid batteries. It will bring your battery up to a full charge and then go into standby mode. If your battery goes below a pre-determined level, the charging process is immediately restarted. Since it operates on normal 110 volt household current and only costs pennies to operate, plug it in and forget about it. From now on, your battery will always be ready.

IMPORTANT INSTALLATION INFORMATION:

All stereo equipment on this page requires a 12-volt negative ground. Use of any other ground will destroy the radio. All of these radios are engineered to fit the original dash opening with no cutting, grinding or snipping; in fact, no modifications at all. All brackets, wiring and plugs, mounting hardware, a chrome bezel and original-looking chrome knobs along with installation instructions complete the package. All of our radios carry the manufacturer's 2-year limited warranty.

180W AM/FM Stereo with Original Appearance

Original Style 14" Knock Off Style Wire Wheel Covers

- Highly detailed reproductions
- Stainless steel (not plastic)
- Buy the set and save
- Includes wheel covers, spinners, emblems, gaskets, and screws

MAC's Antique Auto Parts is proud to offer exclusive reproductions of hard-to-find original style wheel covers for Falcon applications. After extensive research MAC's has identified a need for reproductions of the original 14 inch wheel covers used on 63-65 Falcons and Rancheros, Ford part number C4AZ-1130. Until now, these wheel covers have only been available as Motorcraft parts which can be extremely difficult to find and are very expensive when you can find them, costing up to \$1,500 for a set of 4. With this in mind, MAC's Antique Auto Parts has worked closely with manufacturers to create the highest quality reproduction possible. These covers were made using tooling created from Motorcraft wheel covers and have been tested on a variety of 1963-1965 Ford wheels. These covers not only fit great but will accept both aftermarket and original spinners. Whether you're restoring a classic Ford or you're just looking to spruce up the look of your pride and joy, these wheel covers are the perfect addition. This set includes wheel covers, spinners, emblem, emblem gasket, and screws. (Everything you need to install!)

Car Covers

When the season is over and you want to protect your car, MAC's custom-fitted covers are the way to go. Whether your car is indoors or out, we have the right cover for you.

Poly-Cotton

Poly-cotton car covers are a durable blend of polyester (for sun and water resistance) and cotton (to assure a soft touch to any paint finish). Our most economical cover offers a polyester outer layer that's sun and water resistant with a soft, cotton underside that promises to be gentle on your paint job. Great for everyday use in the garage.

Tan Flannel

Tan-flannel car covers are the best that money can buy, giving you maximum paint protection with a soft, napped flannel underside and a breathable, water-resistant outer layer. Premium indoor storage deserves a premium car cover!

Technalon

Evolution car covers are made of Evolution 4 fabric from Kimberly-Clark. If your car will be out in the elements, then you really need this cover. Its 4-layer polypropylene construction offers you all around weather protection and is the reason this cover is used by car enthusiasts around the globe. Another benefit is the 4-year warranty period, the longest in its class.

Lowest Price Guarantee

MAC's Guarantee is simple: You always get the best quality parts at the lowest price! Show us the identical item advertised in any current magazine, catalog, or website and we'll match our competitor's current price, guaranteed! This offer is available only at the time of purchase and applies to in-stock merchandise only. We can't combine this with any other offer. Tires, restoration services, kits, window glass, cores, reproduction batteries, certain engines, transmissions, used parts, special order parts, and shipping and handling charges are excluded.

Find the Latest Prices on our Website

Prices in this catalog were correct at the time of printing but are subject to change. Visit MacsAutoParts.com for the latest up-to-the-minute pricing as well as hundreds of items not appearing in this catalog. MAC's is not responsible for pricing changes, errors, or omissions in this catalog or online. Prices are subject to change without notice.

100% Satisfaction Guaranteed

Our commitment to you: If for any reason you are not 100% satisfied with any of our products, return them for a full refund, credit or exchange—your choice.

Best Parts, Best Price

This is not just a slogan! MAC's is committed to providing the highest quality parts at the most competitive prices. We source and select all of our parts exclusively from the world's leading brand name manufacturers using our massive buying power. This means you get the best there is, at the best prices in the market today.

Shipping and Handling

Check MacsAutoParts.com for current shipping and handling estimates. In the catalog, denotes items that ship via truck, and denotes oversized dimensions or weight, which incur additional charges.

Gift Certificates

Perfect for when you just can't decide. Available in many different amounts from \$25 through \$1,000. Redeemable for any items we sell.

Need it Fast?

Have your order delivered within 1 or 2 business days by using Express Shipping! Express Shipping is limited to in-stock, non-oversized items weighing less than 20 pounds. Orders must be placed Monday–Friday before 1:00 p.m. EST. Please contact our sales team for rates.

Same-Day Processing

Standard U.S. order processing time for in-stock items is 24 hours. If you need your order processed the same day, call us Monday–Friday before 1:00 p.m. EST and request same-day processing. For a small charge we'll provide special processing of all in-stock parts the same day.

Limited Warranty

MAC's will not be responsible for any damage or loss caused by delays, failures, consequential damage, labor, transportation, or any other charges incurred in the replacement or repair of a defective item. MAC's is not responsible for any consequences resulting from the installation of any parts.
